Instructions to Authors

1. MANUSCRIPTS

- 1.1 All copies should be typewritten with double spacing and wide margins.
- 1.2 In addition to the hard copy, material should also, if possible, be sent on disk (in text only format) to facilitate and expedite the setting of the manuscript.
- 1.3 Abbreviations should be spelt out when first used in the text. Scientific measurements should be expressed in SI units throughout, with two exceptions: blood pressure should be given in mmHg and haemoglobin as g/dl.
- 1.4 All numerals should be written as such (ie not spelt out) except at the beginning of a sentence.
- 1.5 Tables, references and legends for illustrations should be typed on separate sheets and should be clearly identified. Tables should carry Roman numerals, thus: I, II, III, etc and illustrations should have Arabic numerals, thus: 1, 2, 3 etc.
- 1.6 The author's contact details should be given on the title page, ie telephone, mobile, fax numbers, and e-mail address.

2. FIGURES

- 2.1 Figures consist of all material which cannot be set in type, such as photographs, line drawings, etc. (Tables are not included in this classification and should not be submitted as photographs). Photographs should be glossy prints, not mounted, untrimmed and unmarked. Where possible, all illustrations should be of the same size, using the same scale.
- 2.2 Figure numbers should be clearly marked with a sticker on the back and the top of the illustration should be indicated.

- 2.3 Where identification of a patient is possible from a photograph the author must submit consent to publication signed by the patient, or the parent or guardian in the case of a minor.

3. REFERENCES

- 3.1 References should be inserted in the text as superior numbers and should be listed at the end of the article in numerical order.
- 3.2 References should be set out in the Vancouver style and the abbreviations of journals should conform to those used in Index Medicus.

Names and initials of all authors should be given unless there are more than six, in which case the first three names should be given followed by "et al". First and last page numbers should be given.

- 3.3 "Unpublished observations" and "personal communications" may be cited in the text, but not as references.

Article References:

- Price NC. Importance of asking about glaucoma. *BMJ* 1983; 286: 349-350.

Book references:

UN Sustainable Development Goals (SDG's) Revisited

Professor Gboyega A Ogunbanjo

My editorial in the Transactions edition 59 (2) of 2015 titled **“From Millennium Development Goals to Sustainable Development Goals – Are we ready”**, presented a historical perspective of the achievements and failures of the Millennium Development Goals (MDGs). I further focused on MDGs 4 and 5 as the South African Department of Health committed

substantial resources in trying to achieve these goals.

For MDG4 target of reducing under-five child mortality, South Africa did not meet the target of 20 per 1000 live births. It only managed to reduce mortality from 61 per 1000 live births in 1990 to 45 per 1000 live births at the end of 2014. The commonest causes of under-five child mortality are preventable diseases such as HIV/AIDS, which accounted for 17% of under-five deaths, while pneumonia accounted for 14% despite the availability of the pneumococcal vaccine in the Expanded Programme on Immunization (EPI).¹ MDG5 of improving maternal health was not different as the goal was to reduce maternal mortality by three quarters by 2015.

South Africa achieved a minimal drop from 150 per 100,000 live births in 1990 to 140 per 100 000 live births by the end of 2014, against the expected target of 38 per 100 000 live births by October 2015. The risk of maternal mortality remains highest for adolescent girls under 15 years old and complications in pregnancy and childbirth are the leading causes of death among adolescent girls in developing countries.² In South Africa, a significant proportion of maternal deaths occurs in teenage pregnancies accounting for 36% of maternal deaths.¹

We fast forward to May 2018 and ask the question: What has the UN achieved since the launch of the SDGs in September 2015?

It is important to remind ourselves that the specific SDG applicable to health is SDG3.

The latter states to: “Ensure healthy lives and promote well-being for all at all ages” and set some new goals as follows:

- 3.1 By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births (previous by three quarters)
- 3.2 By 2030, end preventable deaths of new-borns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births (Previously by two-thirds)

The 2017 UN global report on SDG3 was disappointing to say the least as very little progress was made in achieving the targets under the various SDGs. It reported that in 2015, the global maternal mortality ratio stood at 216 maternal deaths per 100,000 live births. This fell below the target of less than 70 maternal deaths by 2030 and to accomplish the latter, it required an annual rate of reduction of at least 7.5 per cent, more than double the annual rate of progress achieved from 2000 to 2015. However, in 2016, 78 per cent of live births worldwide benefited from skilled care during delivery, compared to 61 per cent in 2000.

In sub-Saharan Africa, however, the rate in 2016 was only 53 per cent of live births. In terms of the target for mortality rate for children under 5 years of age, globally it was 43 deaths per 1,000 live births in 2015. The rate represents a 44 percent reduction since 2000. Mortality among children under 5 years of age remains high in sub-Saharan Africa, with a rate of 84 deaths per 1,000 live births in 2015.³

With reference to South Africa, what has been the progress with SDG3 related to maternal mortality and deaths in children under 5 years of age since September 2015? There is no current and reliable data on maternal mortality in South Africa available on-line or from any local source. STATSA posted on 27 February 2018, that the under 5-year mortality as of 2016 was 44 deaths per 1,000 live births, which is close to the figure of the MDG4 in September 2015 and since the implementation of the SDGs.⁴ The dearth of current national data on these two important targets under SDG3 is worrying and indicate possible loss of focus in accomplishing the targets as adopted by the UN in September 2015.

There is urgent need for all relevant stakeholders to review the country's progress with the various SDGs and especially the health-related targets. If not addressed, the failures of the MDGs will be repeated by the SDGs in 2030, when the UN reviews global and individual country's progress. We cannot afford to fail again!

Bilateral Agreement The Colleges of Medicine of South Africa (CMSA) and the South African Committee of Medical Deans

Professor Mike Sathekge

I am pleased to announce the signing of a Bilateral Agreement between The Colleges of Medicine of South Africa (CMSA) and The South African Committee of Medical Deans (SACOMD).

We are certain that this agreement will strengthen the need to advance the standards of education and training of medical specialist in South Africa.

It signals the start of a promising and meaningful collaboration that can only lead to one thing:

BETTER MEDICAL SPECIALIST EDUCATION OUTCOMES FOR SOUTH AFRICANS.

“The Objectives of the Agreement are;

- 1. This Agreement is aimed at enabling the parties to work efficiently and effectively to fulfil their respective overlapping mandates; including the objective of the respective universities to foster an environment directed at high quality academic instruction, assessment and research, and for the CMSA, the fair, high quality, peer reviewed, summative assessment of candidates within each specialty and sub-speciality.**
- 2. The parties undertake to foster a relationship of cooperation and support in the offering of the full spectrum of academic activities that lead to quality and sustainable specialist medical care.**
- 3. To manage the dual responsibilities of the persons working for both parties.**
- 4. The parties commit themselves to regular, formal communication.**
- 5. The parties undertake to ensure that any protocols and/or policies are transparent, fair, goal-orientated and free of bias or prejudice.”**

This agreement commits us to work together more closely on tackling some of the challenges such as fulfilment of the requirements for educational rotations as required by the CMSA and SACOMD’s standards of accreditation and the complexities involved in assessing clinical competence, at the Does level of Miller’s Pyramid.

Working together will also enable us to use the **Portfolios as a multipurpose instrument**; portfolios as tools for assessment of performance in the workplace (both for registrars and teachers), but also as tools to stimulate learning from experience.

It is an opportunity to formalize an e-portfolio which will serve a combination of goals with its strengths having to be distributed more evenly over evidence, overviews and reflections.

I would like to express my sincere gratitude to the SACOMD Chair, Professor Martin Veller and SACOMD executive, the CMSA Presidium and the Board of Directors for their dedication and efforts contributed to the finalization of this agreement.

Thus, I trust that we can intensify our relationship of mutual cooperation, support and assistance in respect of setting and promoting high standards of training, education, assessment, professional practice, and continuing professional development.

CMSA President: Professor Mike Sathekge

*“Work hard and be proud
of what you achieve.”*

Admission Ceremony 26 October 2017

The Admission Ceremony was held in the Wits Great Hall, University of the Witwatersrand Main Campus, Jan Smuts Ave, Braamfontein, Johannesburg.

At the opening of the ceremony the President of the Colleges of Medicine of South Africa, Professor Mike Sathekge asked the audience to observe a moment's silence for prayer and meditation.

Dr Aaron Motsoaledi, South Africa - Minister of Health gave the oration.

Eight medallists were congratulated by the President on their outstanding performance in the CMSA examinations.

Medals were awarded in the following Fellowship disciplines:

Emergency Medicine, Obstetrics and Gynaecology, Ophthalmology, Paediatrics and Paediatric Surgery.

The Diplomate Admission Ceremony is now held at the time of the Diploma oral examinations and does not form part of the formal CMSA Admission Ceremony.

The President announced that he would proceed with the Admission to the CMSA of the new Certificants and Fellows.

The new Certificants and Fellows were announced and congratulated.

The Honorary Registrar - Examinations and Credentials, Professor Gboyega Ogunbanjo announced the candidates in order, to be congratulated by the President.

The Honorary Registrar - Education, Professor Jay Bagratee individually hooded the new Fellows.

The Senior Vice President - Professor Johan Fagan handed each graduate a scroll containing the Credo of the CMSA.

All in all, the President admitted 59 Certificants and 381 Fellows.

At the end of the Ceremony the National Anthem was sung, where after the President led the recent graduates out of the hall.

Refreshments were served to the graduates and their families.

K M BROWSE RESEARCH SCHOLARSHIP

The Scholarship is offered primarily as a Research Scholarship at **neurology registrar, senior neurology registrar or junior neurology consultant** level. It is the understanding that the research will be undertaken in a Neurology Department in South Africa.

The scholarship is offered annually whereby funding will be made in four equal instalments and payments must be made into a cost centre of the institution in which the recipient is working.

Successful candidates will be required to submit annual progress and/or final reports on the research compiled, supported by copies of any papers resulting from the Scholarship.

The closing date is 15 January 2019

Oration delivered by Dr Aaron Motsoaledi - Minister of Health at the Admission Ceremony of The Colleges of Medicine of South Africa, University of Witwatersrand, Johannesburg 26 October 2017

Dr Aaron Motsoaledi

Professor Mike Sathekge President of the CMSA, Professor Martin Veller (Dean Faculty of Health Sciences WITS), Senators of the CMSA, distinguished guests, graduates, parents, family and friends... Good Evening to you all.

It gives me great pleasure to be here tonight on the occasion of the CMSA Admission Ceremony. Tonight is not only a celebration of

having additional specialists in our health system but is indeed a celebration of the additional input that we are making towards our Human Resources agenda.

My first words before I even say anything else is to urge the new specialists to stay and practice in our country. Our National Developmental Plan spells out the developmental agenda for our country and aspiration for our people, we cannot achieve any health or developmental goals without you! In staying home you not only contribute to our country but contribute to a broad societal health agenda.

Our country is faced with many challenges but one thing we cannot compromise on is the quality of health services we give to our people. In this regard I would like to congratulate the Colleges of Medicine, Professor Mike Sathekge, for not only producing specialists for our country but ensuring that those specialists are of a high calibre and can provide quality health services to our people. Our human resource project of ensuring adequate workforce for all is richer today!

I want to congratulate the CMSA for working hard to ensure that the college transforms, is representative, inclusive and has equal opportunities. The incoming Senate of the CMSA is the most transformed and I urge you to keep it up.

I also want to recognise and commend you on the enormous work done to ensure a fair and high quality exam that not only responds to the needs of our people but is also respected internationally. The numerous key initiatives such as recording of the exams, drafting on new policies, benchmarking from sister colleges are all noted and commended.

We urge you to continue and strengthen areas that will improve this exam and ultimately ensure a modernised exam that produces specialists who respond to our needs and are enabling us as a nation.

We have as a nation started with our work on the National Health Insurance (NHI). The CMSA is represented on 3 of our committees and is such part of this work. The NHI not only provides an opportunity for our country to implement Universal Health Coverage as part of the SDG agenda but the NHI is an opportunity to achieve our goal of ensuring that all our people including the unemployed are covered under the NHI. We urge you to be part of this social solidarity agenda that will ensure good health outcomes for our people. Further, the work on Primary Health Care with numerous initiatives like the ideal clinic are an opportunity for you to contribute to serving to our people of whom many have not had services before.

In our focus on many health goals the SDGs particularly Goal 3 on health gives us an opportunity to ask ourselves, how can I contribute?

Ernest Hemmingway once said "It is good to have an end to journey toward; but it is the journey that matters in the end." As a country we have come a long way since in our health agenda that was articulated in the "white paper on transformation of health services", a great deal of programs and initiatives have been put in place centred around the ultimate goal of achieving, "health for all", though we may have fallen short in a number of places, we have come far. It is at this point where you, the future of the health sector must play a role. Your contribution should be about giving high quality services to our people but also being part of the broad health dialogue. I would like to congratulate you on this incredible achievement. Thank you too, to the mothers, fathers, children, grandparents and friends who have supported you during this journey!

Continue in your willingness to be a large contributor to the improvement of the health of our people, don't be discouraged by the challenges, and difficulties that you may meet along the way as you serve our people.

I thank you for welcoming me home, as a Doctor, I am deeply touched, and honoured to be here. Finally, remember why you started and continue.

I thank you!

ROBERT McDONALD RURAL PAEDIATRICS PROGRAMME

The late Professor Robert McDonald founded the above programme in 1974 for “**The propagation of Paediatrics in the more remote and underprivileged parts of the Republic of South Africa, by an occasional lecture or visit by someone in the field of the Care of Children**”.

Requests for funding are invited from teams of medical practitioners and senior nursing staff to travel to remote centres and areas to promote Paediatrics and child health and the better care of children and to disseminate knowledge in that field, especially in underprivileged communities.

This can also include visits by medical practitioners or nurses working in remote areas, to larger centres or centres of excellence.

Closing dates for applications are 15 July and 15 January of each year.

The guidelines pertaining to the programme can be requested from:

 Prof L M Sykes Prof A B R Janse van Rensburg
 Dr L Visser Prof M Vorster
 Prof A Walubo Prof J M Warwick
 Dr M B Wertheimer

CEO/COMPANY SECRETARY:

Mrs L Hayes

IN ATTENDANCE:

Mrs A L Vorster (Academic Registrar)
 Mr G F Nel (Financial Director)
 Mrs S Jagger-Smith (Minute Secretary)

1. WELCOME

The President welcomed the attendees to the meeting.

2. REGISTRATION OF PROXIES

The CEO duly registered 9 proxies. A quorum was present.

3. THE MINUTES OF THE SIXTY-FIRST ANNUAL GENERAL MEETING HELD ON 28 OCTOBER 2016

The minutes were adopted and signed.

Proposed: Prof Ogunbanjo

Seconded: Dr Geduld

4. MATTERS ARISING FROM THE MINUTES OF THE LAST ANNUAL GENERAL MEETING

The matters were included in the agenda.

5. CMSA ELECTION RESULTS FOR THE TRIENNIUM 2017 – 2020

5.1 Constituent College Councils and Officers

RATIFIED:

The election outcome for constituent College Councils and Officers.

5.2 Constituent College Representatives on Senate

RATIFIED:

The election outcome for constituent College and Diplomate representatives on Senate.

6. ANNUAL REPORT OF CEO ON BEHALF OF SENATE FOR THE PERIOD JUNE 2016 TO MAY 2017

The CEO stated that the Annual Report of Senate appeared on pages 22 to 31 of Transactions and reflected the activities of the last financial year.

The reports of the various constituent Colleges appeared on pages 32 to 48.

AGREED

The annual report was adopted.

7. RESIGNATION/APPOINTMENT OF DIRECTORS

Mrs Margie Pollock retired as Financial Director at the end of December 2016. Mr Nel was appointed as the Financial Director in January 2017.

8. FINANCIAL REPORT OF THE HONORARY TREASURER: PROF R N DUNN

The audited financial statements were available on the CMSA website.

Prof Dunn went through his PowerPoint presentation.

Prof Dunn pointed out that on the Profit and Loss Statement, it showed a surplus. The Risk Committee met with the Auditors, who were pleased that the CMSA was a going concern in the short to medium term. The large asset base could accommodate losses.

However, the CMSA was running at an operational loss in terms of examinations. This was not sustainable.

It appeared that the CMSA was doing well financially, as the statements reflected a R2.5 million surplus. However, this was only due to the withdrawing of approximately R4.5 million from a trust (donations) to purchase the Durban property. In reality, the organisation incurred an approximately R2 million loss.

Revenue was approximately R31 million, of which the majority was earned from examinations. Approximately R8 million came from members' contributions.

Approximately R24 million was disbursed on examination expenses. This was for direct examination costs, plus indirect costs incurred by the allocation of expenses of the administration offices.

Investment income of about R2.5 million assisted to keep the CMSA operational.

Whereas in previous years, examination candidate numbers increased (due to the incorporation of MMed candidates), the numbers were stabilising. However, there was a marked increase in the number of candidates registering and paying to write examinations, and then withdrawing.

The CMSA were working on reducing expenses. The accounting software was replaced, and line items were made more specific to assist to clarify where money was spent.

A forecast was compiled for up to the year 2023. Although revenue increased annually at 7%, direct examination costs were estimated to increase by between 7 and 15%. Whereas previously, examination costs such as the venue, secretarial support and catering were sponsored, these costs were now for the CMSA's account.

There was a predicted deficit on examinations in 2023 of R6 million. This included examiner stipends, of which 70% were not claimed. If that amount was excluded, the deficit would still be R3.5 million.

The remedial action instituted included increasing examination fees by an additional 3% over CPI (10% per annum increase).

Direct and indirect examination costs would have to be reduced by 2%. Based on this model, a surplus of around R500,000 was predicted for 2023.

Other interventions included reviewing staff requirements. Voluntary retrenchment packages were offered to staff, which did not exceed budgeted salary costs for the year. This would result in a R1.6 to R2 million saving in the next financial year.

An Educationalist would be appointed. This position would be funded externally.

Prof Dunn asked that those at the meeting take the message back to their constituent Colleges that examination costs needed to be controlled, so as not to result in unmanageable increases in examination or membership fees.

THE ANNUAL FINANCIAL STATEMENTS WERE APPROVED.

AGREED

The Honorary Treasurer's report was adopted.

9. REPORT OF THE PRESIDENT: PROF M M SATHEKGE

Prof Sathekge stated that there had been continuous improvement in examinations and feedback to registrars.

Prof Sathekge reported on the Board of Directors' decision to allow the carryover of written results, in order for a candidate who failed the oral examination to repeat it without repeating the written component.

The Board of Directors also decided to move the Senate meeting and examinations two weeks apart, in order ensure that there was enough time to check examination results. The recording of oral examinations was also implemented.

Prof Sathekge commented that the projects were still ongoing, and included the HR needs analysis and investigating the registrar failure rate.

The CMSA were in the process of appointing an Educationalist.

The CMSA, SACOMD, HPCSA and NDoH were working together to solve urgent issues, such as those in radiation oncology.

The CMSA were close to signing a bilateral agreement with SACOMD. The two organisations planned to have functional meetings to discuss assessments and each semester's examination results, quality and the way forward. Work based assessments would be considered.

An IMELF satellite meeting was planned for May 2018, where matters of assessment would be discussed. Presidents of African and international Colleges would be invited.

Prof Sathekge spoke about the importance of mentorship.

The report was discussed.

ACCLAMATIONS

Prof Sathekge thanked the outgoing Senate and Councils, Board of Directors and Vice Presidents who had done an excellent job in making sure that the CMSA could move forward, and for their constructive input and interaction.

Prof Fagan commended the President for resolving issues that had been on the agenda for a number of years, the intervention in the radiotherapy crisis, the wrapping up of the MoU with SACOMD, the sourcing of funding for the appointment of the Educationalist, and also for bridging the divide between the CMSA and the Registrars.

AGREED

The President's report was adopted.

**10. REPORT OF CHAIRPERSON, EXAMINATIONS AND CREDENTIALS COMMITTEE (ECC):
PROF J VELLEMA**

Prof Vellema reported that the ECC dealt with examination processes and ensured reliable, valid and defensible examinations.

Over the previous years, complainants engaged with the Public Protector. Some cases were ongoing, but the process was becoming clearer and easier.

In order to address issues with registrars, the ECC worked hard on clear policies, guidelines and processes, such as for appeals. The CMSA had become a very transparent organisation in terms of exam processes. Despite that, there were still legal issues pending.

A number of workshops were held for examiner training and assessment processes, with international and local speakers presenting.

There had been an improvement in registrar relations, which was partly due to the CMSA roadshows. Upcoming roadshows were planned for Limpopo and the Eastern Cape.

There were changes in the timing of the release of the results for fellowship examinations, which would improve the CMSA's ability to interrogate results.

With regards to the induction of new examiners, the ECC were working on a guideline for the appointment and certification of examiners.

Prof Vellema's report was discussed.

COMMENDATION

Prof Sathekge commended Prof Vellema for doing an excellent

job and for making sure that Manco responded to issues timeously. A special note of appreciation was extended to Prof Vellema for her endless commitment and passion to the CMSA in the last 20 years.

Prof Vellema expressed gratitude to Mrs Vorster and the Johannesburg office staff for their commitment relating to examinations.

AGREED

The ECC Chairperson's report was adopted.

**11. REPORT OF CHAIRMAN, EDUCATION COMMITTEE (EC):
DR S AIYER**

Prof Bagratee reported on the EC's activities, which included the Mthatha outreach programme, administration of lectureships and scholarships, blueprinting and updating of syllabi. The EC were also engaged in CPD activities.

The highlight of the previous year had been the opening of the new Durban office in Claribel Road. There was a dedication ceremony on 5 April 2017, where the CMSA paid homage and expressed appreciation to two long-standing members: Prof YK Seedat and Dr Clive Daniel. The examination hall was named the YK Seedat Hall and the boardroom was named the Clive Daniel Boardroom.

COMMENDATION

Prof Bagratee expressed gratitude to Mrs Sharleen Stone and Mrs Evelyn Naidoo, and thanked the CEO and Senators that attended and supported activities in the Durban offices.

AGREED

The EC Chairperson's report was adopted.

**12. REPORT OF CHAIRMAN, FINANCE AND GENERAL PURPOSES COMMITTEE (FGPC):
PROF G KARIEM**

Prof Kariem reported that the FGPC's main focus had been on improving the financial sustainability of the CMSA, which the Honorary Treasurer had reported on.

Prof Kariem stated that policy had been amended to allow constituent Colleges to pay reinstatement penalties for re-joining members, provided that College Councils agreed with a two third majority vote, and that the individual was still liable for the current fees.

With regards to the levy accounts, traditionally they were allocated on a complex sliding scale. This was amended to be a straight 10% of membership fees received. The levy accounts were originally going to provide the funding for the appointment of the Educationalist. However, an external source of funding had been found.

It had been decided that only one Presidential dinner a year would be hosted (in October) due to austerity measures. However, this had not been implemented as yet, due to the visit from the West African College of Physicians in May 2017 and the IMELF satellite meeting in May 2018.

COMMENDATION

Prof Kariem gave special thanks to Mr Nel and Prof Dunn for their hard work on the finances.

Prof Sathekge commended the CEO and staff for dedication and hard work throughout the year.

AGREED

The FGPC Chairperson’s report was adopted.

**13. REPORT OF CHAIRMAN, SOCIAL AND ETHICS COMMITTEE (SEC):
PROF B CASSIM**

Prof Cassim reported that all principles in relation to the Social and Ethics committee had been adhered to.

It was noted that training was provided to staff in ethics and security and it was felt that the CMSA needed to adopt a policy on ethics, particularly with regards to conduct on social media.

AGREED

The SEC Chairperson’s report was adopted.

**14. REPORT OF EDITOR OF TRANSACTIONS:
PROF G A OGUNBANJO**

Prof Ogunbanjo reported that the July to December 2017 edition would be the last edition to be printed, and all subsequent editions would be electronic only, due to cost implications.

The previous copy of Transactions had cost R80,000, with the July to December 2017 edition costing R103,000 due to the inclusion of the annual reports.

The development of an app for the Transactions Journal was discussed.

COMMENDATION

Prof Ogunbanjo thanked Mrs Sharleen Stone, and the Johannesburg and Cape Town offices for their submissions to and work on the Transactions journal.

Prof Ogunbanjo was commended for his work on the publication.

Prof Ogunbanjo acknowledged Prof Sykes’ (the Deputy Editor’s) help with the Journal.

AGREED

The Editor’s report was adopted.

15. ANNUAL APPOINTMENT OF AUDITORS

AGREED

The re-appointment of C2M as the auditors.

16. CORRESPONDENCE

None.

17. CLOSURE

The business of the meeting concluded at 11:40.

Rondebosch

AWARDS 2018

MAURICE WEINBREN AWARD IN RADIOLOGY 2018

Submission received is as follows:

Dr R Ramlakhan

RWS CHEETAM AWARD IN PSYCHIATRY 2018

Submissions received were as follows:

Dr C Marsay

Dr T Madigoe

The recipient of the award is as follows:

Dr T Madigoe

MS BELL AWARD IN PSYCHIARTY 2017

This Congress took place on 14 - 17 September 2017 at the National Biological Psychiatry Congress in Cape Town.

The recipients of the award are as follows:

Dr A Anic

Dr GA Michie

MS BELL AWARD IN PSYCHIARTY 2018

Will take place in September 2018 at the 19th National Congress of the Society of Psychiatrists.

(The recipient/s will be selected at the Congress)

LECTURESHIPS 2018

JN and WLS JACOBSON LECTURESHIP 2017

Dr C Ackermann presented her lecture entitled "Quantifiable Imaging abnormalities of white matter using FA in HIV infected children compared to controls" on the 5 November 2017 at the Durban International Convention Centre.

JC COETZEE LECTURESHIP 2017

Prof K Mfenyana presented his lecture entitled "From community service to engaged scholarship: a strategy for reducing health inequities and improving health outcomes" on the 19 August 2017 at the Joint 5th WONCA Africa and 20th National Family Practitioners Conference in Pretoria.

JC COETZEE LECTURESHIP 2018

Prof L Denny will present her lecture at the 21st National Family Practitioners Congress on the 25 August 2018 in Cape Town.

KM SEEDAT LECTURESHIP 2017

Prof SS Naidoo presented his lecture entitled "Social Determinants of Health - The time for action is now" on the 20 August 2017 at the Joint 5th WONCA Africa and 20th National Family Practitioners Conference in Pretoria.

KM SEEDAT LECTURESHIP 2018

Prof S Van As will present his lecture at the 21st National Family Practitioners Congress on the 25 August 2018 in Cape Town.

FP FOUCHÉ LECTURESHIP 2017

Dr R O'Keefe presented his lecture entitled "Diversity in Orthopaedics: Does it make us Better? A USA Perspective" on the 04 September 2017 at the South African Orthopaedic Congress in Port Elizabeth.

FP FOUCHÉ LECTURESHIP 2018

To be announced

ARTHUR LANDAU LECTURESHIP 2018

Prof B Mayosi will present his lecture on the 15 April 2018 at the 37th Medicine Update in Durban.

COLLEGE OF OBSTETRICS AND GYNAECOLOGY HONORARY LECTURESHIP 2018

Prof G Lindeque presented his lecture entitled "Transgenderism" on the 05 March 2018 at the 38th National Congress of the Society of Obstetricians and Gynaecologists in Durban.

EDUCATIONAL ROBERT MC DONALD RURAL PAEDIATRIC PROGRAMME 2017

No applications were received.

KM Seedat Memorial Lectureship

Social Determinants of Health in South Africa – Time For Action

Lecturer: Professor SS (Cyril) Naidoo, Retired Chief Specialist, Servier Chair and Head, Department of Family Medicine, UKZN, Honorary Associate Professor of Research, Durban University of Technology.

Correspondence: Professor SS Naidoo naidsoor@gmail.com

Delivered at: 5th Wonca Africa - 20th National Family Conference in Pretoria 20 August 2017

My sincere thanks and gratitude is extended to the Local and African Organising Committee of the 5th Wonca Africa 20th National Family Practitioners Conference for affording me the privilege and honour to deliver the prestigious annual KM Seedat Memorial Lecture for 2017.

It is indeed a singular honour and privilege to attempt to walk in the shadow of such a distinguished social scientist, family physician and philanthropist who contributed so much in social and health engineering during his lifetime (1897-1997).

My first reaction on hearing that the theme for this year's conference would be "Social Determinants for Health – Time for Action" was: "Oh no! Surely this is déjà vu", considering that this topic had been deliberated upon so many times by so many stakeholders (*local, national and international*) to the point of exhaustion over the last three decades.

I recall that each of these had culminated in a plan of action, however, we are yet to see the fruits of such deliberations.

In my humble view, the time for action has long past, and we are now into "added time or referee's time" as the football pundits would call a game of soccer which appears to be heading for a stalemate.

Indeed, significant stakeholders in health care especially in South Africa viz. providers and receivers of care, have bemoaned the lack of progress or action at the coal face where health care is delivered.

Patience is running out and the clamour is growing for health care activists to rise and be counted in the battle for meaningful changes within the health care system and for receivers of care to benefit from the much-earned outcomes in health care.

Since 2008, many reports have been published reflecting on the state of health in developing countries including those in Africa.

The World Health Organization (WHO) published its report in 2008 during the 30th anniversary of Alma Ata¹; this landmark publication endorsed the concept of Primary Health Care being delivered within

a patient centred health care system, and emphatically proclaimed that it would influence health advocacy, improve health inequities, and make health authorities more accountable.

The SA Health Review (2008)² commented that the South African health care system had become weaker when compared to the 1990s, and attributed this to the following factors:

1. Inter-provincial disparities and inequity between private and public sectors as well as between rural and urban compartments.
2. The skills mix being insufficient, poor support structures and challenges within facilities.
3. Lack of equipment provision and poor management structures.

The review called for creative strategies within both sectors to address these inequities and challenges.

The Lancet in its much-publicised and widely-acclaimed landmark publication in 2009 and subsequent publications in 2012, commented on the emergence of 4 colliding epidemics in South Africa (*HIV, TB, Non-communicable diseases, and Trauma*) and their negative impact on health outcomes.³⁻⁷

South Africa has a weak and inequitable health care system despite spending 8.7% of the gross domestic product on health care (*more than any other country in Africa*). The authors identified a number of challenges and made recommendations to the authorities on possible improvements to the system.

The current perception by many stakeholders is that these epidemics have not only collided with each other but have coalesced to create a "tsunami" of epidemics, thus adding to the current cumulative burden of disease and burden of care.

In 2011, Health 24, a publication of the Health Professions Council of South Africa (HPCSA) published a stinging critique on policy makers and health officials related to the ongoing exodus of health professionals from South Africa (*including doctors, nurses and the allied professions*).

⁷ It has been estimated that only 50% of the total number of medical doctors (37333) registered with the HPCSA in 2011 currently remain and practise in this country.

The main countries that appear to have benefited from this dynamic exodus include the United Kingdom, Australia, New Zealand and Canada.

A number of push factors were identified especially in the public sector; these included poor working conditions, long working hours, poor salaries and lack of incentives, freezing of public sector posts, lack of consultant posts and inadequate supervision of junior colleagues.

This disturbing scenario has the potential of seriously damaging our health care system because it impacts on the required ratio of health care workers per patient population, training and supervision of junior workers, standards of health care and morbidity and mortality.

A study conducted in 2008 ranked the different health care systems across the world based on access to health care and quality of health outcomes.

⁸ Disturbingly and paradoxically, South Africa featured twice simply because of the current reality that there are 2 operating systems providing health care in parallel in this country viz. private versus public health care system operating side by side.

Ironically, South Africa featured amongst the best by virtue of the highly rated private sector component (*where the quality of health care is of a very high standard and comparable with any first world country*), and it also featured amongst the worst because of the shambolic public health care system.

South Africans warmed to our newly appointed National Minister of Health (*in his Rubicon speech on 13 April 2010*) when he identified with and lamented the damaging data published on the state of health in South Africa and promised to tackle head-on all challenges facing our health care system.

⁹ In this major budget speech, he enunciated a strategic health plan with a number of key priorities linked to millennium developmental goals already identified by the World Health Organization.

Primary Health Care was again identified as the priority programme in driving this agenda, and the District Health Care System was chosen as the vehicle to deliver on long-anticipated health care outcomes desired by the majority of end users of the system.

The commission on social determinants of health (*appointed by the World Health Organization in 2010*) provided developing countries with a useful conceptual framework to tackle gaps in health care systems and improve health equity by focussing on social determinants of health.

¹⁰ It recommended a context-specific strategy that must include a dynamic interplay between macro-environmental issues:

1. Such as broad public health care policy, provision of housing and improving access to water, ownership of land, decent housing, sanitation and access to food and nutrition
2. Micro-environmental issues such as living and working conditions, personal behaviours, personal mental and physical health as well as lifestyle issues that impact on health.

Any cross-sectional situational analysis of the current state of health care in our country will reveal alarming statistics.

We appear to have improved only in a few isolated fields such as:

1. HIV awareness and access to anti-retroviral drugs.
2. Educational and awareness strategies addressing harmful effects of cigarette smoking and alcohol usage.
3. Imminent proclamation of a National Health Insurance Act.

Sadly, the negatives appear to outweigh and overshadow any gains emanating from the above-mentioned strategies, and the majority of South Africans across any spectrum (*political or socio-economic*) remain pessimistic about future health care provision for themselves and their families.

In summary therefore, it is clear that we are still currently saddled with an over-burdened, under-resourced, fragmented and collapsing public health care system serving more than 60% of communities on the one hand, and which paradoxically co-exists with an over-resourced, unsustainable, high-tech self-destructive private health care system that caters for the health care needs of only 30% of the population.

The current private health care system based on invoice has also been denounced in dramatic terms as legalised corruption.

Generally speaking, it is widely perceived that curative care overshadows any attempt at preventive care.

Economists and actuaries continue to label the current system as very expensive, cost-ineffective and a heavy drain on our economy.

They claim that any plans on the table at present will have minimal positive impact on narrowing gaps related to equity, health outcomes and millennium development goals.

The proposed National Health Insurance Act remains a pipeline dream for the majority of South Africans, and only time will tell if it becomes a reality and achieves the desired outcomes for all people living in this country.

I am hopeful that the swell of public opinion and agitation from the majority of health care workers (*including medical doctors, nurses, and paramedical workers*) in both public and private sectors will grow into a sizeable meaningful force for change.

We must continue to agitate for an improved system based on the principles of Alma Ata (*2008*).

I am also hopeful that all you will converge in endorsing a proposed Pretoria Declaration by virtue of you being present at this conference in Pretoria today (*20 August 2017*).

The Pretoria Declaration 2017 must of necessity include the following key elements and principles:

1. A systematic country-wide review of Human Health Resources must be undertaken.

2. The current policy must be strengthened to fill all vacant or frozen posts with the correct personnel selected on merit.
3. Only those with the correct skills mix - irrespective of colour, race, creed, status or connections must be employed and held accountable in terms of executing their mandates efficiently and effectively.
4. Generalists must take their rightful place in the hierarchy of health care delivery.
5. The critical mass of generalist doctors currently working in both private and public sectors (*over 20 000 currently registered*) must be consolidated into one working mass and harnessed into the future proposed National Health Insurance system.
6. All generalists (*meeting minimum acceptable criteria such as active participation in continuing medical education programmes*) should be translated into the new generalist category called Family Physicians. (*This strategy is similar to what transpired in the United Kingdom when its National Health System was first established*).
7. Negotiations must be kick-started to integrate these doctors into a capitation system similar to the system operating in the United Kingdom.
8. At present, the category of Family Physician seems to resonate only with public service appointments in terms of remuneration and career pathways.
9. Family Physicians are currently not reimbursed appropriately in the private sector although they are registered by the Health Professions Council into the category of Specialist Family Physician.
10. Chronic care patients (*fulfilling the criteria for Prescribed Minimum Benefits*) must be decongested systematically from public health facilities to private generalists who have been capitated.
11. The referral pathway as enunciated in the District Health Care and the Norms and Standards Packages must be respected and adhered to by all stakeholders including end-users.
12. Incentives and a conducive work environment must be created so that emigrant health care workers return and bolster the current failing system.
13. Graft and greed pervasive in the current system must be eradicated at every level of the proposed health care system.
14. Transparency and whistle-blowing must be encouraged by policy makers and facility managers.
15. A smart health card (*similar to the current new identity card, and which is widely used in many other countries such as Australia*) must be introduced for all clients using the health care system (*public or private*). This strategy will go a long way in streamlining access and standardised health care at the point of entry, and avoid unnecessary duplication of care and wasted costs.

SOUTH AFRICAN SIMS FELLOWSHIP SUB-SAHARAN AFRICA

Nominations are invited from Presidents of eligible Colleges for the above Fellowship.

The objective of the Fellowship is to establish and maintain educational development programmes in sub-Saharan Africa.

The disciplines of medicine eligible for the South African Sims Fellowship are the same as those eligible for the Sir Arthur Sims Commonwealth Professorship, ie Anaesthesia; Cardio-thoracic Surgery; Medicine; Neurology; Neurosurgery; Ophthalmology; Orthopaedics; Otorhinolaryngology; Paediatrics; Plastic Surgery; Surgery (General) and Urology.

The nomination must be submitted with the CV of the nominee, a motivation from the President of the College (as above) and an outline of the proposed visit.

The closing date is May 2019

Further information regarding the fellowship can also be obtained from:

Mrs Evelyn Chetty

Obituary: Professor A M Segone

Professor A M Segone was born in Kokosi, Fochville. He attended the Secondary School in Polokwane. He then received a Scholarship to Fort Hare where he undertook a BSc Degree in Chemistry and Zoology. He passed the BSc Degree with a distinction in Chemistry. He then went to Wentworth Medical School KZN for six months.

Whilst in Wentworth, Prof. Segone received another scholarship to go and study medicine in the University of Sheffield, UK. After obtaining the MB ChB degree in Sheffield, he trained as a General Surgeon in Manchester which culminated into the Fellow of the Royal College of Surgeons (FRCS) diploma. It was during his training in General Surgery that he gained an interest in Urology. Prof. Segone's training in Urology was done at the Institute of Urology and at the Central Middlesex Hospital in London, UK.

After working as a Consultant Urologist in Liverpool (UK) and Harare (Zimbabwe), Prof. Segone came back home in 1992. He was Professor of Urology at the Dr George Mukhari Academic Hospital and Medunsa (now Sefako Makgatho Health Science University) from 1994 to 2008 and then continued to work as Consultant/Specialist in the Department of Urology until May 2017.

He played a role in the establishment of Sefako Makgatho Health Sciences University as part of the Interim Council. He has served on various boards of different institution such as the CMSA, Correctional Services and the Forum of Statutory Health Councils of South Africa etc.

Professor A M Segone
May His Soul Rest In Peace

R W S CHEETHAM AWARD IN PSYCHIATRY

The award is offered annually (in respect of a calendar year) by the Senate of The Colleges of Medicine of South Africa for a published essay of sufficient merit on trans - or cross - cultural psychiatry, which may include a research or review article.

Medical Practitioners registered and practising in South Africa qualify for the award which consists of a medal and certificate.

The closing date is 15 January 2019

***The guidelines
pertaining to the award
can be requested from:***

CMSA Membership Privileges

LIFE MEMBERSHIP

Members who have remained in good standing with the CMSA for thirty years since registration and who have reached the age of sixty-five years, qualify for life membership, but must apply to the CMSA office in Rondebosch.

They can also become life members by paying a sum equal to twenty annual subscriptions at the rate applicable at the date of such payment, less an amount equal to five annual subscriptions if they have already paid for five years or longer.

RETIREMENT OPTIONS

The names of members who have retired from active practice will, upon receipt of notification by the CMSA office in Rondebosch, be transferred to the list of “retired members”.

The CMSA offers two options in this category:

First Option

The payment of a small subscription which will entitle the member to all privileges, including voting rights at Senate or constituent College

elections. If they continue to pay this small subscription they will, most importantly, qualify for life membership when this is due.

Second Option

No further financial obligations to the CMSA, no voting rights and unfortunately no life membership in years to come.

Members in either of the “retired membership” categories continue to have electronic access to the Journal Transactions and other important Collegiate matter.

WAIVING OF ANNUAL SUBSCRIPTIONS

Payment of annual subscriptions are waived in respect of those who have attained the age of seventy years and members in this category retain their voting rights.

Those who have reached the age of seventy years must advise the CMSA office in Rondebosch accordingly as subscriptions are not waived automatically.

Checklist for CPD Applications

DOCUMENTS REQUIRED

RETROSPECTIVE ACCREDITATION IS NO LONGER ALLOWED

1	Fully completed 2A CPD Application Form
2	Copy of detailed programme reflecting: a) Start and End times b) Tea, Lunch and Dinner breaks
3	Presenters CV
4	Dedicated Ethics presentations: a) CV of speaker should include ethics proficiency
5	Advertisement / Invite must feature: a) The Accreditor b) Accreditation number c) Level of the activity d) Number of CEU's
6	Journal Clubs: a) Accreditation subject to retrospective provision of attendance registers and journals. b) Presenter roster and topics (if allocated) should be sent prospectively with the application
7	CPD Certificate, upon completion of the activity reflecting: a) The Accreditor b) Accreditation number c) Level of the activity a) Number of CEU's b) Number of Ethics CEU's
8	CPD 7 form on the HPCSA website must be completed by the attendees

CPD Accreditation applications can be submitted together with all the above relevant documentation to:

Criteria for CMSA Endorsement of CPD Activities

1. The CPD activity and its content will have to meet the approval of the relevant College council and considered to be of a standard that will enhance the image of that College.
2. The organizer of the CPD activity should ideally be a member of the CMSA in good standing.
3. The constituent College must take full responsibility for the completion of the CPD accreditation application. Any CMSA membership discount to be noted under "Registration Fee involved for participants" on the CPD 2A Form.
4. The CPD activities should primarily be run under the banner of the constituent College of the CMSA. Due restraint should be exercised by the respective college ensuring that engagement in partnerships with organizations and entities in CPD activities remain appropriate and in keeping with the standing of the CMSA.
5. The constituent Colleges of the CMSA should not associate themselves with CPD activities of commercial entities related to product launches or product specific CPD activities.
6. Sponsorships of these CPD activities are permissible provided that the principles as set out below are closely adhered to:
 - a. The names of the sponsors should not be included in the title of the CPD activity.
 - b. The sponsor may be acknowledged as a sponsor on the advert/notification and on the programme for the CPD activity but no advertising of the commercial entities products should appear on either of these documents.
 - c. The mailing of adverts/notifications of the CPD activities may however be accompanied by product literature separated from and not incorporated in the notification/advert of the CPD activity.
 - d. No product promotion is allowed within the CPD meeting room but company-branded items and promotional material may be displayed in a separate area that should not be accessible to the general public if the products are not allowed to be advertised to the public.
 - e. In addition to the above, the sponsored activities should strictly adhere to the code pertaining to marketing and promotions to healthcare professionals as set out by the Marketing Code Authority.
7. The determination of the Risk and Profit split remains within the discretion of each individual college in consultation with the organisers of the activity. The overall principle that Risk Share follows Profit Share must apply.
8. However, the main thrust of running CPD activities under the auspices of the CMSA and its constituent Colleges remains most importantly the provision of benefits for ongoing membership of the CMSA, the enhancement of the overall image of constituent College and the CMSA and not the generation of additional income.

A benefit in the form of a meaningful discount for the CPD activity registration fee for CMSA members in good standing should take preference over profit sharing and remain the chief consideration.

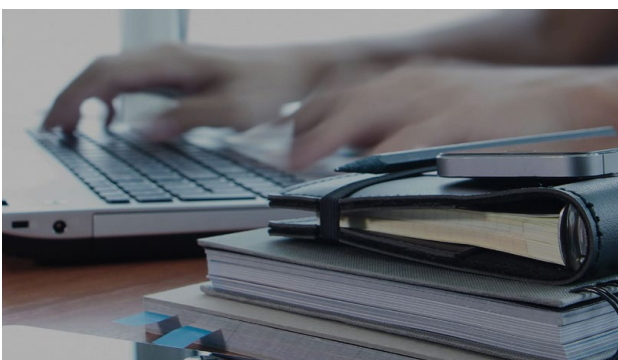

This was a very important motivation for extending free CPD accreditation originally.
9. On completion of the activity the organisers of the CPD activity must provide the College with a final assessment by the participants with the minimum of the following points to be covered:
 - a. Content
 - b. Presentation
 - c. Organisation / Administration
 - d. Venue
 - e. Overall value

*“Choose a job that you love
and you will never have to
work a day in your life.”*

Standard Operating Procedure for CPD Accreditation

ROLE AND RESPONSIBILITY OF THE CMSA EDUCATION OFFICE (ACCREDITOR)	
1	Check that the CPD 2A application form is completed and all supporting documentation required as per the checklist on the website has been received
2	Application is submitted to the CMSA CPD sub-committee for review
3	On approval of accreditation, the invoice is sent to the provider / applicant
4	On receipt of payment the service provider / applicant will receive the accreditation number and the approved CEU's

**THE ACCREDITOR:
REVIEWS AND APPROVES APPLICATIONS FOR THE PROVISION
OF CPD ACCREDITATION**

“Become and expert on your subject.”

ROLE AND RESPONSIBILITY OF THE APPLICANT (SERVICE PROVIDER)	
1	Submit a completed CPD 2A application form together with the supporting documentation as per the checklist on the website in line with HPCSA guidelines including the proposed advert and CPD certificate for the activity
2	Application for accreditation of a CPD activity must be made PRIOR TO ADVERTISING/ISSUING INVITATIONS as the accreditation number and number of CEUs accredited must appear on the advert/invitation. Allow 10 working days for accreditation. RETROSPECTIVE ACCREDITATION IS NO LONGER ALLOWED
3	Service provider/applicant must present certificates of attendance to attendees at the end of the activity or send to attendees within one month . ATTENDANCE CERTIFICATES MUST CONTAIN THE FOLLOWING: a) The ACCREDITATION AND ACTIVITY NUMBER (a board specific identification) (e.g. MDB001/12/09/2008) b) The TOPIC of the activity (ethics, human rights and health law must be specified separately) c) The LEVEL of the activity d) The NUMBER OF CEUS for that activity e) The ATTENDANCE/COMPLETION DATE f) The NAME AND HPCSA REGISTRATION NUMBER of the attendee
4	A COPY OF THE SIGNED ATTENDANCE REGISTER must be submitted to the accreditor and the original retained for a minimum of three years

**SERVICE PROVIDERS ARE:
INDIVIDUALS / INSTITUTIONS / ORGANISATIONS THAT SUBMIT
LEARNING ACTIVITIES TO AN ACCREDITOR FOR REVIEW AND
ACCREDITATION PRIOR TO PRESENTING THE CPD ACTIVITY**
